

”  
A STYLE  
ALL AROUND  
YOUR HOUSE  
“

We were still looking for a patio cover with a louvered roof and a carport in the same style to match our newly built home. We found the ideal solution with Algarve and Algarve Canvas from the Algarve Line. The elegant structure fits in beautifully with our sleek architecture and meets our needs perfectly. Our car can now be parked under the shelter of an Algarve Canvas and the value of our home has increased considerably. We used Algarve to create the ideal climate on our terrace and we have a structural solution that protects us from sun, rain, wind, and cold thanks to the adjustable louvered roof, the sun screens, and the stylish heating system.

CARPORTS

ALGARVE® CANVAS

Algarve® Canvas

## ALGARVE CANVAS®

This elegant carport offers lasting protection by means of a fixed roof made up of 2 layers: a solid top roof made of white lacquered, profiled steel sheet with anti-condensation coating and an aesthetic lower roof, finished with a stretched canvas with zip technology. The screen is tautly stretched in the structure, without any visible additional beams. It is available in 8 colours. Algarve Canvas is just as useful as a fixed patio cover, carport or as an awning above the front door, for instance. In addition, a combination of an Algarve with rotatable louvered roof and an Algarve Canvas with fixed roof structure is possible to create a single, uniform style around the house.

# INSTALLATION OPTIONS

## Types of installation

*Algarve Canvas – Freestanding*

*Algarve Canvas – Façade mounting*

*Algarve Canvas – 2-part coupling on the Span side*

## Personalization possibilities

*Loggia*

*Glass sliding panels*

*Surface-mounted Fixscreen*

*Linus fixed wall*

*Curtains*

### **Fixscreen® 100<sup>EVO</sup> Slim F / Fixscreen® 150<sup>EVO</sup> F - Algarve® Line**

To close off the sides of the Algarve Line, it can be combined with the Fixscreen 100<sup>EVO</sup> Slim F and the Fixscreen 150<sup>EVO</sup> F. This allows the box for the sun protection screen to be mounted underneath the frame profiles so that this connects perfectly with the basic construction.
